

Scouting Report

Bay Village High School

Bay Village, Ohio

THE ISSUE: After enduring many days of play, the natural grass field at Bay Village High School was in need of an overhaul.

THE JOB: SCG was hired to replace the worn grass field with a technologically advanced, TigerTurf brand, synthetic system that was guaranteed to provide a safe, durable and less abrasive surface for Bay Village athletes.

THE RESULTS: Athletes, coaches, parents and community members alike were more than satisfied with the final result. The coaches were pleased with the density of the grass filaments and have said the surface is softer than other competitor fields. Clint Keener, Bay Village City Schools Superintendent, commended SCG for its quality and efficient work. "The important thing is that SCG really knows what they're doing. From the foreman to the office and all the way through – they're experts in field construction," he said. "After watching the site work and installation in action, it is clear to see why SCG continues to do work for major universities and professional athletic teams," he added.
