

Scouting Report

Tower Hill School

Wilmington, DE

THE ISSUE: Tower Hill, a private school with students in grades K – 12, needed a multi-purpose field to accommodate its field hockey and lacrosse athletes; among the school's other students for general use.

THE JOB: SCG was hired to install a durable, synthetic, AstroTurf PureGrass system.

THE RESULTS: "We couldn't be happier with the new field! We think we got the perfect surface," said Jack Halloway, Tower Hill's athletic director. The school's Board of Trustees was also pleased with the turf's quality, beauty and performance.

Leading up to opening ceremonies, rain drenched the recently completed field; however, the newly installed drainage system proved effective and opening ceremonies, as well as the first game, commenced without a hitch. "We anticipate the field will last for many years," said Halloway.
